Missouri Medical Professionals Encourage NO Vote on Amendment 3: Stop Politicians from Banning Abortion Again

As physicians and medical professionals across Missouri, we strongly oppose Amendment 3, which would once again ban abortion in nearly all cases in our state. This amendment would put health care decisions in the hands of politicians and lawyers — not patients, families, and their doctors, where they belong.

In 2024, medical professionals spoke loudly and clearly, along with the overwhelming majority of Missouri voters, when we voted to end the ban on abortion and put the Right to Reproductive Freedom Amendment in our state constitution. We made it clear that we don't want politicians making medical decisions for our patients and our families. But now politicians are trying to overturn our votes and once again ban abortion in nearly all cases.

While politicians are playing these games, we want to make it very clear: the new Amendment 3 is in abortion ban that takes away a woman's right to make her own medical decisions. Physicians and patients alike could be sent to jail just for providing or receiving essential reproductive health care — even in life-threatening situations. If Amendment 3 passes, women dealing with hemorrhaging, high blood pressure, even cancer, might not be able to get the care they need until it's too late.

It's not just abortion that the Right to Reproductive Freedom Amendment protects. The 2024 amendment ensures the right to access prenatal care, maternal health care, birth control, and IVF. These are standard but personal components of health care, and decisions around them should remain between Missourians and their doctors.

Missourians, including us, already voted to end the abortion ban and protect reproductive freedom. We must vote NO on Amendment 3 to stop politicians from overturning the will of the people and once again banning abortion in nearly all cases. We must vote NO to ensure that Missouri families and doctors have the freedom to make their own health care decisions — not politicians.

Signed:

C Aam, MD, Internal Medicine

K Abe, CRNA, Anesthesiology
